

CLAIMS

1. A sheet for an embossed carrier tape having a tear strength of at least 105 N/mm as defined in JIS-K-7128-3.
2. The sheet according to Claim 1, which has a surface resistance of at least one surface of at most $10^{12} \Omega/\square$.
3. The sheet according to Claim 2, which is a single-layer sheet.
4. The sheet according to Claim 2, which is a multi-layer sheet.
5. The sheet according to Claim 4, which has a base layer and an electrically conductive surface layer.
6. The sheet according to any one of Claims 1 to 5, which uses a thermoplastic resin.
7. A sheet for an embossed carrier tape which uses a thermoplastic resin, which has a base layer and a surface layer having a surface resistance of at most $10^{12} \Omega/\square$ on both sides of the base layer, and which has a tear strength of at least 105 N/mm as defined in JIS-K-7128-3.
8. An embossed carrier tape which comprises the sheet as defined in any one of Claims 1 to 7.
